EDUCATIONAL APPS LAB

Participant Registration Quick Guide

For parents, guardians, participants, school coordinators, and group leaders using currently live features.

Choose the correct registration

1	Open the public event page.
2	Select **Attend the event** for participants. Do not use **Help with the event** unless registering as a volunteer.
3	Choose **Individual or family** or **School or organized group**, depending on the options enabled by the organizer.

Individual or family

1	Enter the parent/guardian information once.
2	Enter each child separately. Use **Add another participant** for siblings or multiple children.
3	Review school and grade information, then complete registration.
4	Save every child's individual QR credential. Each child has a separate attendance record.

School or group

1	Enter the school/group and coordinator information.
2	Add roster members one at a time.
3	Complete registration and save the group QR plus each participant QR shown on the confirmation page.
4	At event arrival, present the group QR to staff. Staff must confirm individual attendance on the roster.

Event day

1	Bring the saved credential on a phone or printed page. Children do not need accounts or phones.
2	If a person arrives separately from a group, staff can use that participant's individual credential or manual roster control.

Currently live
Manual family and school/group registration, individual participant credentials, group credentials, participant scanning, and manual individual attendance are live.

Not yet available
CSV roster upload, confirmation email delivery, and full family/group batch controls are still being completed. Enter group rosters manually for now.
