EDUCATIONAL APPS LAB

Volunteer Quick Guide

For registered volunteers using the currently live VolunteerHQ workflow.

Before the event

1	Open the event registration link provided by the organizer.
2	Choose the event day or days you can attend when the event has multiple dates.
3	Enter your name, email, phone, and school/organization as requested, agree to the guidelines, and select **Complete registration**.
4	Save the QR credential shown after registration. Keep it available on your phone for event day.

At check-in

1	Open your saved QR credential and increase phone brightness if needed.
2	Present the full QR code to the check-in staff. Hold the phone still until staff confirms the scan.
3	Listen for the staff confirmation. Do not walk away until your name shows as checked in.
4	If the scanner cannot read the code, give staff your name or email for manual lookup.

At checkout

1	Return to the check-in station before leaving when checkout is required.
2	Present the same QR credential. Staff switches the station to **Check out** before scanning.
3	Confirm that staff sees the checkout message before leaving.

Important
A volunteer QR works only in Volunteer Event Mode. It will not check in an event participant.
